

Air Quality Testing Services

Quality Environmental Monitoring Solutions

- TruHorizon has the expertise to support your air quality projects for dust, odor and volatile organic compounds. Trust TruHorizon's engineering team of professionals to meet your project goals and regulatory requirements.

We Provide:

Environmental Air Quality Measurement and Monitoring Solutions for:

- Dust (PM1, PM2.5, PM5, PM10)
- Odor (CH4, H2S)
- Volatile organic compounds (VOC, tVOC, BTEX)
- EPA ambient air quality standards (CO, Pb, NO2, O3, PM2.5, PM 10, SO2)
- Air quality index (AQI)
- Meteorological data

Instrumentation and Equipment:

- EPA reference air quality monitoring
- EPA FEM dust monitoring
- Indicator air quality monitoring
- Weather stations (six parameter)

Rental, Testing, Engineering and Consulting:

- Long term monitoring deployments
- Short term measurements and data acquisition
- Consulting, sub-consulting agreements
- Equipment rental with remote online access
- Predictive modeling and assessments

Reduce Cost and Exposure:

- Regional offices in Dallas, Denver and Pittsburgh
- Project support across North America
- Data measurement, collection, reporting, analysis and results for documentation and compliance reporting
- Customizable reporting and analysis per project requirements
