

Environmental Inspection Services

Quality erosion and sediment control services for state and federal regulatory compliance.

Site Inspections

- ✓ The approved erosion and sediment control plan and PSCM plan are on-site.
- ✓ Best management practices are installed and maintained as planned.
- ✓ All activities are within the limits of disturbance.
- ✓ The construction sequence is being followed.
- ✓ HSE concerns, such as spills, damaged containment, and improper chemical storage or labeling, are identified and reported.

Waterline Inspections

TruHorizon inspects both active and inactive water systems, including pipelines, intakes, storage, and transfer facilities. They check for hazards like spills, leaks, vandalism, and liner damage, and ensure compliance items, like proper signage and site permits, are in place.

TruHorizon Team Certifications

- + Qualified Stormwater Compliance Inspector and Preparer of Stormwater Pollution Prevention Plans
- + OSHA 40-Hour HAZWOPER Training
- + MSHA Coal Mine Impoundment Inspection (U.S. Department of Labor)
