

Whisper Temporary Source Treatment Acoustic Panels

The ideal solution for temporary noise pollution.

A variety of Source Treatment options are available.

End-to-End Service for Barrier installation, maintenance, and removal.

Acoustical Services to assess Noise Pollution Risks and deliver optimal solutions.

Superior Noise Control
STC Value: 28–36
NRC: 0.1–1.0
Noise Attenuation: 10–20dB

Temporary Sound Mitigation (Rental)

- ✓ Source Treatment Panels available in heights ranging from 12–20ft tall and widths of 8–20ft wide.
- ✓ Panels are assembled on-site and can be easily maneuvered into position. Multiple panels can be linked together to form barriers that can be relocated as needed to accommodate project requirements.
- ✓ Panels can be configured with standard man door with panic hardware for safe and compliant ingress/egress.

Installation Methods

- ✓ No digging, or one calls needed for installation as no embedment is necessary
- ✓ Panels attached to stands or bases with anchor pin system
- ✓ Counterweight blocks added to freestanding panels for added wind load performance
